

Narrative financial report of the year 2020

ICP wants to support planting new intercultural churches across Europe.

Expanding

- In 2019 we started new partnership with Serenissima Italy, to support this Italian network to plant more intercultural churches.
- We saw a steady growth in those places where we have networks. In the Netherlands and the UK, a couple of about 10 new churches we involved in the network.
- We started strategizing for the season after COVID and started developing a plan for working with Alpha Courses that would grow into missional communities, to make churchplanting easier to start with and to multiply.
- We started building on new relationships with people across Europe who are interested to join us in the new vision of planting churches through missional communities.
- We started building new relationships with Alpha, DMM and others, as partners for the new strategy.
- Due to COVID we were not able to travel, so we focused more on the time after COVID and strengthening and supporting existing churchplants.

Equipping

- We worked on meeting monthly with all catalysts in Italy, Netherlands, UK together.
- We also invested a lot in personal chats with those catalysts and coaching them.
- Through increased number of Zoom meetings many more people got training and coaching online.

Establishing

- We finalised our treasure chest and build many more materials to work with in the future
- We were building on our financial foundation, since we realised, we needed more money and workers with the new vision.
- Our back office has been built more strongly through Marjan Groenendijk.
- The Songs2Serve branch has grown since we started to build a European team around Rieneke Visser. So, more songs became available, and the team is stronger than ever.
- ICP EU has been preparing for a new season with a new office and new workers for 2021.
