

Narrative report 2021 (S2S)

The year 2021 was the first full year of working with a team in Songs2Serve Europe. We coached a team in the UK and in the Netherlands and expanded the group co-creators, the group of people who help translating songs, writing music etc. We have set up a structure on how to meet these co-creators.

We received coaching ourselves, on our work as well as on functioning as a team.

During springtime we prepared the conference in September, because we wanted to record the music at the conference, in the hope that we could improve our website with better videos.

Although we hoped for more songs that were done well enough, we still have 6 new videos on our website (by now) from the conference that the churches can use. Because of corona the singers we invited from abroad could not come so we needed to change the plan a few times..

At the conference we met more people to work together with for Songs2Serve so they too joined our co-creators' group.

The end result was visible at our website- this year we added 20 songs! That means there has been a lot of work behind the scenes in translating, peer reviewing, finding chords, writing sheet music, asking permission to authors and translators etc.

At the end of the year, we decided to start a new project; recording 25 songs of Songs2Serve professionally, so that we can make a book that churches and small groups can use. So, we prepared it in finding the right person who can direct this project together with me.

Expanding our team is high on the agenda since we always have more work than we can do.
